

REMARKS

This is in response to the Office Action dated May 17, 2005. Examiner rejected claims 1-16, and 22 under various grounds in view of various references. Claims 17-21 were objected to as being dependent upon a rejected base claim, but indicated as allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. Examiner also noted that certain reference character(s) not mentioned in the description were found in the drawings and required either corrected drawing sheets or amendment to the specification to achieve consistency.

The specification has been amended to make it consistent with the drawings. Claims 4-9, 16, 17, and 22 have been canceled. Former claim 17 has been rewritten as amended Claim 1 to include all the features of former claims 16 and 17 and therefore is believed to be allowable. Original claims 2, 3, 10, 11, 12-15 depend from allowable claim 1 and are therefore also believed to be allowable. Claim 18 has been amended to depend from claim 1 and is therefore also believed to be allowable.

Claim 19, previously dependent on claim 1 has been rewritten in independent form incorporating all the features of claim 1 and is therefore believed to be allowable. Claims 20 and 21 depend from claim 19 and are therefore also in condition for allowance.

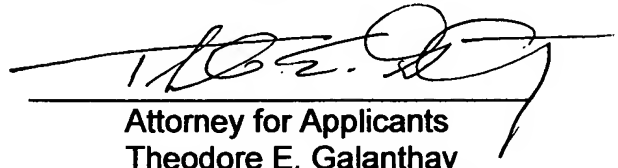

In view of the foregoing, all the claims remaining in this application, to wit, 1-3, 10-15, and 18-21 are believed to be in condition for allowance. If Examiner has a
